LET'S MAKE SPACE!

INTRODUCTION:

This song is a call and response song between two groups of singers: **Group A** and **Group B**. It also is a very active song involving movements such as stepping, jumping, crouching, and standing. Dynamics and singing styles are a big part of this song - people will sing softly, very loud, very low, and there are moments calling for shouts and whispers. All actions are written in the score.

PERFORMANCE NOTES:

At first, only the teaching artist will sing **Group A's** part. Everyone else in the class will be **Group B**. Repeat this format for a few classes. At the beginning of the song, the teaching artist says "Everyone follow what I do!" This is for actions such as crouching, standing, stepping, jumping, etc. The teaching artist can gesture towards the class in a conducting manner to cue when **Group B** goes.

When the children become familiar with **Group A's** part, the class can be split into two halves: **Group A** and **Group B**. Their roles can alternate from week to week. For example, the teaching artist can say "If you were Group A last week, you get to be Group B this week!" and vice versa.

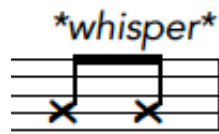

The song repeats the same musical structure throughout. Each stanza is identical in melody and "shouting vs singing" element.

SHOUT/WHISPER/SPEAK:

In the **lead sheet**, parts that are not sung, but shouted or whispered instead, are indicated with x-noteheads:

Let's make

Get down

Let's go
